

BELGIAN CRAFTSMANSHIP SINCE 1972

Your sleep, our care.

A refreshing night's sleep is worth its weight in gold. After all, those who sleep well are fitter, more creative and more positive in life. That is why we at Revor Bedding have been keeping an eye on your sleep happiness for 50 years.

With passion, but also a great deal of knowledge about sleep, our team rolls up its sleeves every day to give you carefree nights. By inventing new solutions to your sleep problems together with doctors and scientists. By watching over the future and reducing our ecological footprint. But mainly by simply making beautiful and good beds. In Belgium. For every budget. For every body.

Your sleep? Leave that to us.

Revor. Since 1972.

What began 50 years ago with a small sleep shop has grown into a European player in the production of beds, mattresses and box springs. Every day, our almost 300 employees ensure that Revor Bedding is your brand of trust.

Belgian is better.

Revor beds and mattresses are handmade in Belgium. And we are proud of that. With high-tech machinery, motivated and an experienced team guarantees top quality.

And everything we do is done with care for the future. This is not only ensured by the many solar panels or pioneering, environmentally friendly and renewable materials. Bees grow honey in the Revor garden, limit plastic at our lunches or simply turn down the heating a degree.

Sustainability is simply part of our corporate culture.

Everyone's sleep!

We know: choice stress does not help your sleep. But have no fear, Revor puts everyone to sleep. Classic or modern, hard or soft, king-size or snug, we have it.

But even those with special needs can come to us. Our mattress finder will help you make the right choice. From back patient to sweater, from snorer to allergy sufferer, we have a quality solution for each and every one of you.

Because if there is one thing we never compromise on, it is: quality.

It is a misconception that an afternoon nap disrupts your sleep. Also, such a 'power nap' makes us more alert and allows our memory to function better again. Even more, it is said it has a positive effect on blood pressure and reduce the risk of heart failure.

Ergonomic quality.

Our busy schedules demand a lot from our bodies. Sometimes too much. Both physically and mentally, we test our limits. We are hardly ever able to 'rest'. That is why optimum sleep is essential for a healthy body and a clear mind.

Revor Bedding makes every effort to optimise your sleep. We pay attention not only to the looks of our beds, but more than anyone else to their ergonomic qualities. You can dream of a night's sleep again and really wake up in the morning and enjoy what really matters.

The best version of yourself.

Pioneering is in Revor's blood. Almost fifty years ago, we were revolutionising the world of sleep with our latex mattress. Doctors and back specialists helped to found it. It is a company spirit that we still apply today. With scientists and experts, we like to push back frontiers.

The result is an impressive list of innovations we have unleashed on the sleep sector: from the first sleep comfort range with electro-smog-resistant properties to the fully recyclable mattress, from an innovative antibacterial fabric to a smart bed that monitors your sleeping pattern.

Every day we want to improve, to optimise your sleep so you can be the best version of yourself.

Signed and approved.

In our design department, beds are drawn, redrawn and redrawn again every day. Until it's right.

Our product designers base each bed on the ergonomics of the sleeping system, but also ensure that each bed meets today's aesthetic requirements and tomorrow's trends. Only in this way you can enjoy your box spring for years to come.

Signed and approved, Revor Bedding.

Ecologically responsible.

Because we are already thinking about tomorrow's sleep, we at Revor take the most ecological approach possible.

We make informed choices and strive for a healthy, responsible production chain. This way, we choose not only for your peace of mind, but also for that of the planet. And that, in turn, calms us.

“

Plenty of testing, but not yet scientifically proven: Sleeping with your head facing north (in the direction of the Earth's magnetic field) is said to be good for sleep. Even if it does not work, it does not harm.

Because tastes differ, you can have any Revor bed ordered in the fabric of your choice. Or in a leather look. Revor consciously chooses timeless, stylish colours. After all, you don't change a bed every season. Greys and browns in all their variations are therefore the most common.

Good in bed.

A bedroom is more than just a place to sleep. It is equally the place where you find rest after yet another busy day. Watching some TV. Going through the newspaper. Having a nice chat. Then gently doze off and recharge your batteries for another busy day. Each and every day.

The cosiness of a nest.

In addition to the ergonomics of a bed, at Revor we attribute great importance to an extremely pleasant feeling of comfort. We do this by selecting the right materials and densities.

In this way, we want the bedroom to become part of the heart of the (young) family; watching TV together, having breakfast in the morning sun, waking up together ... Everything becomes more cosy in a warm nest.

Rather be lazy than tired.

They want to enjoy life, those young people. And rightly so!
So getting up fresh is a must. But they also want to do what they feel like without any worries. In complete privacy.

For them, a bed is more than just a bedroom companion. It is also their living room. Their lounge. Sometimes even their dining room... It is the place where they can hang out, chat, listen to music. And sometimes even do nothing...

— Box 25, Headboard Directo, Upholstery Sixty white 02, Legs I naturel, Bedside table Twin

“

For many young people, their bedroom is the only place where they can truly be themselves and find mental peace.

Something to think about.

Because Revor is all too aware that tastes differ, you can have any Revor bed upholstered in the fabric of your choice. Or in imitation leather.

Revor consciously chooses timeless, stylish colours. Greys and browns in all their variations are therefore the most common. But we also have a wide range of timeless imitation leathers.

Let your bed integrate perfectly into your existing interior and choose a calm colour you feel safe with. It gives you extra peace of mind before going to bed. At Revor, we also pay attention to the practical side of our box springs. For instance, we have several fabrics that have received an easy-clean treatment. These fabrics are very easy to wash.

Compose your own bed!

Do you know perfectly well what you want? Then you are also in the right place at Revor! With us, you can put together your own bed. Completely according to your wishes and taste. Personalise your purchase and choose which elements you combine with each other, in the colour of your choice.

STEP 1

Choose your box spring

You can choose box springs of different heights and finishes. For double beds, you can choose one wide box spring (mono) or two joined single elements (duo). Don't forget the colour and width, of course.

STEP 2

Choose your legs

Each leg gives a totally different look to your box. It also determines the final height of your bed. So make your personal choice from our very extensive range of wooden and metal legs.

STEP 3

Choose your headboard

Also consider the width: do you leave the headboard as wide as the bed or do you let it extend along the sides? In case you opt for bedside tablets, the latter is definitely something to consider.

STEP 4

Choose your matras

Choose the mattress that suits you best. Choose from various models of latex, pocket spring and foam mattresses in hard, medium or soft versions. It is best to get advice from your sleep specialist when making this choice.

OPTIE

Choose your topper

To achieve even better sleeping comfort, you can - following the Scandinavian example - put another thin topper on top of your mattress. This adds greatly to the feeling of comfort while sleeping. Also here you have a choice of different cores and firmnesses.
